

SERVICES

Identity Security

Identity must be governed, accountable, and adaptable to secure every identity that can reach your business resources. Leverage our deep expertise to help you build an identity program that scales across human and non-human identities.

Service

Description

Service Components

Identity Technology Selection Services

Objective, requirements-led guidance for evaluating identity technologies and making informed platform decisions. Services define business and technical requirements, map vendor capabilities, and support the evaluation process through selection, ensuring investments align with security, governance, and operational needs.

- Requirements Development and Evaluation Criteria
- RFI and Proof-of-Concept Support
- Capability Mapping and Vendor Comparison Architecture & Integration Readiness Assessment
- Strategic Fit & Procurement Decision Support

M&A Identity Integration & Risk Management Services

Identity risk and integration guidance across mergers, acquisitions, divestitures, and restructuring. Services assess identity risk before a transaction closes, plan the consolidation of identity estates, and maintain governance and compliance continuity during integration.

- Pre-Acquisition Identity Risk Profile and Due Diligence
- Two-Stack Rationalization and Access Consolidation
- Governance and Compliance Continuity Planning
- Day 1, Day 100, and Year 1

Executive Identity Advisory Services

Ongoing, senior-level identity advisory delivered on a fractional or on-call basis. Services provide executive guidance on identity strategy, governance, and program direction while helping ensure the identity roadmap remains aligned to business priorities and evolving risk considerations.

- Fractional and On-Call Identity Advisory
- Identity Strategy and Roadmap Reviews
- Governance and Operating Model Guidance
- Recurring Executive Advisory Sessions
- Board and Executive Reporting Support

Let's establish governance and accountability across every identity in your organization.
